Narrative:

This project will replace three existing pipeline crossings currently installed under Amazon Creek which are being replaced with two new pipelines to be attached underneath the City's new pedestrian bridges at Dillard Road and 37th Street. Since the original pipes were installed, the creek bed has eroded significantly. EWEB's pipelines are now exposed, posing a risk to infrastructure integrity. EWEB investigated possible solutions, including boring new pipelines under Amazon Creek or constructing pipe bridges. Both of these options are subject to substantial construction costs (design engineering, materials, labor, and permits).

EWEB contacted the City of Eugene to explore the possibility of partnering on their planned pedestrian bridge crossings. By partnering with the City of Eugene on this project, EWEB is able to significantly reduce the costs to replace our at-risk pipelines across Amazon Creek as well as reduce construction impacts to the community. The new pipelines and bridges are designed and will be built to resist seismic forces. EWEB will reimburse the City for the installation of two new pipelines attached to the bridges spanning Amazon Creek. Eventually, EWEB will abandon all three of the old, exposed pipelines.

Staff developed an Inter-Governmental Agreement collaboratively with the City and it was approved and signed by the City Manager on May 16, 2018. EWEB's drawings and specifications will be included with the City's solicitation in June 2018. If this IGA is approved and the bids are within the Not to Exceed amount of \$190,000, EWEB will approve awarding the work to the City's contractor.
