

# Move Green

## Get there with clean, electric transportation

Whether you already have an electric vehicle, or you're considering electric transportation options, we can help with incentives, information and expertise.

- REBATES FOR HOME AND PUBLIC CHARGING STATIONS**  
In addition to the cost savings you'll get from driving an EV, there are also EWEB rebates and tax incentives that could save you thousands of dollars on your purchase or lease.
- E-BIKE REBATE**  
Reduce air pollution and have fun getting around on an electric bike. Our e-bike incentive will help increase access to more affordable, zero-emission transportation.
- ELECTRIC CARSHARING**  
You don't have to own a car to drive electric. Our partnership with Forth Mobility brings three electric car sharing stations to Eugene, including a dedicated station for residents of St. Vincent de Paul's Iris Place.
- COMMUNITY GRANT FUNDING**  
We're pleased to offer grant funding to help increase awareness, access, infrastructure, and adoption of electric mobility in EWEB service territory.
- EV EVENTS**  
EWEB and our community partners host events to provide customers the opportunity to ask questions and experience electric transportation firsthand.

## GreenOptions

Save energy & water

Drive or ride electric

Invest in renewable energy

Offset your carbon footprint
